SUMMARY

I currently hold a position as a DevOps Engineer with over 2 years of experience, where I specialize in diverse DevOps technologies including Docker, Kubernetes, Jenkins, and Terraform. Additionally, I possess proficiency in Bash scripting, Java programming, Linux administration, as well as familiarity with front-end technologies and the Spring Framework.

Experience

Medimaze Solutions Pvt. Ltd. | Pune

August 2022- Present

DevOps Engineer

As a DevOps engineer, my responsibilities are designing, implementing, and maintaining automated systems for continuous integration and deployment (CI/CD). I will collaborate with software developers, system administrators, and other stakeholders to streamline the software delivery process. I involve in creating and managing infrastructure as code (IaC) using tools like Terraform, Kubernetes, Jenkins, Ansible, optimizing cloud infrastructure for scalability and cost efficiency, monitoring system performance and reliability, and troubleshooting issues as they arise.

August 2022- August 2023

Full Stack Java Developer Trainee

As a full-stack Java developer, my responsibilities are designing, developing, and maintaining both front-end and back-end components of web applications. This entails creating responsive user interfaces using frameworks like Angular or React, as well as implementing server-side logic using Java and frameworks like Spring Boot. I will collaborate with cross-functional teams to understand requirements, write clean, efficient code, and ensure software quality through testing and debugging. I will stay updated on industry trends, technologies, and best practices, while actively contributing to code reviews, documentation, and continuous improvement initiatives to deliver high-quality, scalable solutions.
